ICoLA 2024

Hyejung Choi (Hallym University, Republic of Korea)

Professor Hyejung Choi is currently a clinical assistant professor and imaging cardiologist at Kangdong Sacred Heart Hospital, and her specialty is echocardiography. From 2012 to 2016, she completed her residency in Internal Medicine at Gyeongsang National University Hospital, followed by a fellowship in Cardiology at Seoul National University Bundang Hospital from 2021 to 2022. In 2023, She served as an assistant professor in cardiology, focusing on echocardiography imaging research and mainly treating patients with myocardial and valvular heart diseases, as well as heart failure

Professor Hyejung Choi's research focuses primarily on understanding and predicting the clinical course of various heart diseases through detailed echocardiographic analysis, particularly myocardial strain. She is also interested in detecting subtle myocardial changes caused by metabolic diseases and She hope that her future research will contribute to early diagnosis and improved treatment of heart disease.

She is pleased to share her recent research findings on the management of hyperlipidemia at this conference, contributing to our understanding and treatment of this disease.
