Hye Won Lee (Yonsei University, Republic of Korea)

Dr. Hye Won Lee is a dedicated physician and researcher with a focus on chronic liver diseases, particularly nonalcoholic steatohepatitis (NASH) and hepatitis B virus (HBV) infections. She earned her medical degree from Ewha Womans University College of Medicine and her Ph.D. from Yonsei University College of Medicine. Dr. Lee completed her residency and fellowship at Severance Hospital, where she currently serves as an Assistant Professor at Yonsei University College of Medicine.

Dr. Lee expanded her academic and research experience during a two-year tenure as a visiting scholar at the Chinese University of Hong Kong. Her commitment to advancing the understanding and treatment of liver diseases has been recognized through several awards and research grants from various institutions and academies.

Known for her contributions to the medical community in Korea, Dr. Lee continues to engage in impactful research while providing exceptional patient care. Her work aims to improve the diagnosis and treatment of chronic liver conditions, demonstrating her dedication to both her patients and her field.
