ICoLA 2024

Il Minn (Johns Hopkins University, USA)

Dr. Minn is an associate professor of Radiology at University of Texas Southwestern Medical Center. Dr. Minn received a bachelor's degree in Biochemistry from Hanyang University and a master's degree in Biotechnology from Korea Advanced Institutes of Science and Technology, South Korea. He holds Ph.D. degree in Biochemistry, Microbiology, and Molecular Biology from the Pennsylvania State University. Dr. Minn completed his postdoctoral fellowship at Johns Hopkins University where he started to study the biology of human diseases. He was an assistant professor of Radiology and Radiological Science and an associate member of the Institute for the NanoBioTechnology at Johns Hopkins University. Dr. Minn's main research interest is to develop molecular theranostics agents for human diseases using multiple disciplines including synthetic biology, molecular imaging, and nanotechnology.
